REQUEST FOR PROPOSAL FOR SELECTION OF AGENCY FOR EVALUATION OF PROJECTS UNDERTAKEN UNDER CAMPA, GIM, WDC-PMKSY IN THE STATE OF SIKKIM

1. Background

CAMPA: Under CAF Act 2016 Compensatory Afforestation Fund Management and Planning Authority(CAMPA) has been constituted for the management funds deposited for compensatory afforestation, NPV and other money recoverable, in compliance of the conditions stipulated by the central government and in accordance with the Van Sanrakshan Evam Samvardhan Adhiniyam, 1980.

Compensatory Afforestation Fund Act, 2016 came into force from 30 September 2018. The Act established a National Compensatory Afforestation Fund under the Public Account of India and State Compensatory Afforestation Fund under the Public Account of each state. The payments made for compensatory afforestation, net present value and others related to the project will be deposited in the fund. The Compensatory Afforestation Fund Rules were notified in August 2018.

Under CAMPA, large-scale activities have been taken up to accelerate preservation of natural forests, management of wildlife, infrastructure development in the sector and other allied works. As SFD is implementing CAMPA activities, there is now a felt need to technically evaluate these ongoing efforts, and based on the learnings, plan the way forward. Also, an evaluation methodology of the works implemented must be evolved and implemented to ensure effective and proper utilization of the fund.

Compensatory Afforestation fund is used for plantation while money for Net Present Value is used for activities relating to conservation of forests and wildlife, development of infrastructures in these sectors and other related works. The major activities include plantation; conservation, protection and management of wildlife and its habitat within and outside protected areas; research and tree improvements; soil and water conservation; development of infrastructures; capacity building and other activities is going under the state CAMPA.

Green India Mission:

Forest & Environment Department, Government of Sikkim has been implementing National Mission for a Green India (GIM) in Sikkim with the financial assistance from the GIM Directorate, Ministry of Environment and Forests and Climate Change (MoEF&CC), Govt. of India through the State Forest Development Agency (SFDA) and (09) Forest Development Agencies (FDA) under the Department since 2018-19.

The National Mission for a Green India (GIM) was announced as one of the eight Missions under the NAPCC. GIM envisages a unique strategy for holistic treatment of landscapes selected on the basis of their predicted vulnerability to climate change and status of forest degradation for overall improvement / restoration of forests, local ecology and enhancing alternate and forest based livelihood opportunities of forest dependent communities.

In Sikkim, State Forest Development Agency has proposed 25 L2 Landscapes (Milli Watershed) in 6 (Six) broad landscapes as L1 Landscapes (Watershed) for implementation of the mission on the basis of a combination of criteria & indicators including projected vulnerability to climate change, forest cover and forest types (with status of degradation), wastelands, and presence of STs / SCs, dependence on forests, and poverty

levels.JFMC/EDC/Village level units (L3) are the actual units which are collated with landscape/operational unit level plans

Under this mission various Plantation works like Artificial Regeneration, Aided Natural Regeneration, Seabuckthorn Plantation, Avenue Plantation, Silviculture Development, Plantation in urban, peri urban areas and farmlands have been undertaken. Besides several activities were undertaken Livelihood Activities and Strengthening Forest Department and local level institutions.

WDC-PMKSY 2.0:

The continuation of WDC- PMKSY has been approved by the Government of India on 49.50 lakh ha and indicative Central financial outlay of Rs. 8,134 crore, The unit_cost of projects has been revised upward from Rs 12,000/ha to Rs 22,000/ha for plain areas, and Rs 28,000/ha for the difficult areas and upto 28000/ha difficult/LWE areas, The States/UTs have been asked to use GIS and Remote Sensing techniques for better planning of projects. The States/UTs have also been suggested to map activities from other sectors which could be taken been reduced from existing up within the project areas for better convergence in a saturation mode. The project period has years to the rejuvenation of the Springs has been incorporated as a new activity in the WDC-PMKSY 5 years. On the recommendations of NITI Aayog, 2.0 within the approved cost. At present, a total of 1150 Projects covering an area of 50.55 lakh ha with central share cost of Rs.8073.55 cr have been sanctioned in all 28 states and UTs of Jammu & Kashmir and Ladakh.

WDC-PMKSY 2.0 is at its mid-point period of implementation. Hence the mid-term evaluation of these projects is proposed to be carried out to obtain feedback on the initial impacts of the programme and the bottlenecks faced if any in the process of its implementation. This mid-term evaluation would enable a pathway analysis at the mid-course providing for improvement in the next course. The M&E system on the whole is designed as a learning mechanism with corrective options both at the project & policy level. The proposed mid-term evaluation is a part of this overall strategy with following focus area.

- i) Help in deriving strategic lessons for mid course correction, if any, in the approach and designs of the project and its implementation, and assess whether the vision of economy, equity and ecology is being realized at ground level. The findings should help effecting necessary changes in implementation strategy and reorient the focus on different components of the project development plans if required.
- ii) To identify process gaps and assess performance and quality of outcomes. The evaluation will be on the physical, technical, and financial aspects of the project .

2. Objective of the Proposal

According to the guidelines issued by Ministry of Environment and Forests and Climate Change(MoEF&CC), GOI, monitoring of these activities is necessary. The present RFP is being floated to select an agency to carry out Third-Party monitoring/Mid term Evaluation of the projects under F&ED.

CAMPA: The Third-Party is expected to monitor & evaluate the CAMPA works undertaken as per annual plan of operations (APO) for the financial year 2020-21, 2021-22, 2022-23 and 2023-24.

GIM: The third party will monitor & evaluate the GIM works undertaken as per annual plan of operations (APO) during the year 2018-19 to 2023-24.

WDC-PMKSY-2.0: The mid-term evaluation has the following key objectives:

1. **Strategic Lessons and Mid-Course Corrections:** Derive lessons from the initial phases of the project to implement mid-course corrections in its approach and design. Assess whether the vision of economy, equity, and ecology is being realized at the ground level and recommend strategic changes to the implementation strategy, if necessary.
2. **Process Gaps and Performance Assessment:** Identify gaps in the implementation process and evaluate the performance and quality of project outcomes. This includes examining the physical, technical, and financial aspects of the project to ensure alignment with the intended objectives.
3. **Learning for Improved Implementation:** Provide valuable insights on institutions, technologies, processes, resource allocation, and impacts to inform modifications in project design and improve implementation in the remaining phases.
4. **Feedback on Initial Impacts:** Analyse the initial impacts of the program, bottlenecks faced, and the effectiveness of activities implemented so far to ensure that future steps align with the overall goals of WDC-PMKSY.

Scope of work for Monitoring & Evaluation agency:

- a) Monitoring & Evaluation (M&E) Agency is required to deploy well qualified team and supporting staff for carrying out assessment of quality of plantations and other activities in a time bound manner.
- b) The technical proposal should contain details methodology for monitoring & evaluation within time frame
- c) The agency will submit year wise detailed comprehensive report for the activities under the projects:

Specific to CAMPA: The third-party agency will carry out the following activities undertaken by utilizing CAMPA funds during FY 2020-21, 2021-22, 2022-23 and 2023-24 by different wings / forest divisions of the Forest and Environment Department,as under:

1. The conservation, development and other related activities are being carried out by all divisions of the State.
2. Major activities include plantations under different models; conservation, protection and management of wildlife and its habitat within and outside protected areas; research and tree improvements; soil and water conservation; development of infrastructures; capacity building and other activities carried out under State CAMPA during the said period.
3. The year wise list of works taken up during the said period along with location is appended herewith as Annexure-I
4. The Monitoring & Evaluation (M&E) Agency is required to integrate its approach in lines with the e-green watch portal of the Ministry of Environment, Forest and Climate Change for monitoring of plantations taken up under CAMPA.

Specific to GIM:

1. The selected Agency will be required to comply with the instructions, if any, issued by the State Forest Development Agency for GIM-Sikkim.
2. All field activities to be undertaken at the office of the respective FDA or the District Offices. Projects to cover under the assignment and location of FDA are as presented in Annexure II. The personnel of the service provider may be required to visit to respective landscape offices for performing the assigned tasks. On completion of the FDA level tasks the agency personnel may have to work, if necessary, at SFDA offices.

Specific to WDC-PMKSY 2.0:

1. All field activities to be undertaken at the office of the respective FDA or the District Offices. Projects to cover under the assignment and location of FDA are as presented in Annexure III. The personnel of the service provider may be required to visit to respective landscape offices for performing the assigned tasks. On completion of the FDA level tasks the agency personnel may have to work, if necessary, at SFDA offices.
2. WDC-PMKSY 2.0 is at its mid-point period of implementation. Hence the mid-term evaluation of these projects is proposed to be carried out to obtain feedback on the initial impacts of the programme and the bottlenecks faced if any in the process of its implementation. This mid-term evaluation would enable a pathway analysis at the mid-course providing for improvement in the next course. The M&E system on the whole is designed as a learning mechanism with corrective options both at the project & policy level. The proposed

mid-term evaluation is a part of this overall strategy with following focus area.

- i) Help in deriving strategic lessons for mid course correction, if any, in the approach and designs of the project and its implementation, and assess whether the vision of economy, equity and ecology is being realized at ground level. The findings should help effecting necessary changes in implementation strategy and reorient the focus on different components of the project development plans if required.
- ii) To identify process gaps and assess performance and quality of outcomes. The evaluation will be on the physical, technical, and financial aspects of the project.
- iii) Learning related to institutions, technology, processes, resource allocation and impacts, besides other aspects of implementation can feed as valuable inputs for effecting necessary modifications and designing of the course of implementation.

Methodology for PMKSY

Mid-term evaluation will employ mixed method approach, combining quantitative and qualitative data collection methods. The evaluation team will ensure the participation of all stakeholders and adopt participatory approaches to data collection and analysis. It may include the following components. Document review Key information interviews Focus group discussions (may use also- Participatory Learning & Action (PLA) Surveys/ questionnaires Field Assessment and Observations Participatory rural appraisal (PRA),

Sample size & area coverage for PMKSY

i) Impact study will be confined to the WDC-PMKSY 2.0 projects implemented with the support of the DoLR funds.

ii) The study will cover 100% of the WDC-PMKSY2.0 projects sanctioned in Sikkim. The project evaluation of all the activities required to be carried out in the 3 micro watersheds covering all three reaches i.e. upper reaches middle reaches and lower reaches (all micro watersheds shall be covered where some of the projects cover only 1(one) or 2(two) micro watersheds). ii The study will cover 30% of households from the selected micro watershed for evaluation iv. In addition to the above about 10% of the total households in three (3) control adjoining villages outside in each project with similar topography & socioeconomic features. This would facilitate a comparative analysis of with & without project scenarios. The control villages are one each from the upper, middle and lower reaches 2.3. Time Duration of the Project - The project is to be completed within 5 months, however the entire exercise should be completed by November 2024 3. Indicators for Mid-term evaluation A list of indicators is given in Annexure-VIII These will be incorporated into an online data entry module / mobile application to be developed by DOLR for data entry by the evaluating agency for each of the project evaluated and to be submitted on the online module portal to DOLR. Over and above the given list of indicators, States/UTs may incorporate other parameters as per their specific requirements for ex, Case studies, Sustainable Livelihood for continuous income generating activities (IGA) may be included) 4, Evaluation Agency The States/UTs may engage a reputed agency for undertaking the evaluation and ensure the completion of work and submission of data within the stipulated timeline.

8.1 Evaluation & Selection

Quality and Cost Based Selection (QCBS) shall be used for evaluation with Technical Proposal carrying 70% weightage and Financial Proposal carrying 30% weightage. The Technical Proposals are given an absolute technical score (Ta out of max 100) based on the evaluation criteria given below. The normalized score for technical shall be calculated by multiplying the absolute score with 70% to arrive at the technical score to be added to Financial score. $St = Ta * 70\%$ The Financial Proposals would be given cost-score based on the relative ranking of prices, with the lowest evaluated Financial Proposal (Fm) being assigned the maximum financial score 30. The formula for determining the financial scores (Sf) of all other Proposals is as follows: $Sf = 30 \times Fm / F$, in which "Fm" is the price of the lowest offer, "Sf" is the financial score calculated, and "F" is the price of the proposal under consideration. 8. The preferred bidder shall be the Applicant who achieves highest combined score i.e. St+

Technical Evaluation

Initial Bid scrutiny will be made and in complete details as given below will be treated as non responsive of Proposals

- a. Received without the Letter of Authorisation
- b. Are found with suppression of details
- c. With incomplete information, subjective, conditional offers and partial offers submitted
- d. Submitted without the documents requested in the checklist
- e. Have non-compliance of any of the clauses stipulated in the RFP
- f. Have a lesser validity period
- g. The team members are not as RFP stipulations.

All responsive Bids will be considered for further processing as below.

Tender Committee will prepare a list of responsive Applicants, who comply with all the Terms and Conditions of the Tender. All eligible bids will be considered for further evaluation by the Committee according to the evaluation process defined in this RFP document. The decision of the Committee shall be final in this regard.

- i. Evaluation committee will examine the bids to determine whether they are complete, whether any computational errors have been made, and whether the bids are generally in order.
- ii. Further the scope of EC also covers taking any decision with regard to the Tender document, execution/implementation of the project including management period.
- iii. Proposal shall be opened in the presence of Applicants representatives who intend to attend at their cost. The Applicants representatives who are present shall sign a register giving evidence of their attendance.
- iv. Proposal document shall be evaluated as per the following steps.
 - Preliminary examination of pre-qualification/ eligibility criteria documents: The prequalification document will be examined to determine whether the Applicant meets the eligibility criteria, whether the Proposal is complete in all respects, whether the documents have been properly signed and whether the bids are generally in order. Any bids found to be non-responsive for any reason or not meeting the minimum levels of the performance or eligibility criteria specified in various sections of this RFP document will be rejected and will not be considered further.

Annexure V:Evaluation Formats for Evaluating Works under CAMPA

10.1Plantation Evaluation

The bidder shall undertake monitoring of the plantation sites as part of the scope of work. A minimum of **10%** of the total plantation area and other proposed activities shall be mandatorily covered for monitoring purposes.

The total percentage of field coverage may be proposed by the firm. The number of plots will be two per site of size 23m X 23m. This plot size has been reduced from standard approach for the hilly terrains in Sikkim, but the representative hectare remains approximately the same as being represented by considering one plot of size 33m X 33m. The GPS coordinates of all such (23 m x 23 m) plots also need to be provided. The selected Firm will propose the evaluation Formats for all the activities undertaken under the projects.

However, if the bidder proposes to adopt an alternative scientifically justified methodology that involves a different percentage of area coverage (higher or lower), they may submit the same along with adequate rationale and supporting documentation. Such proposals will be evaluated on the basis of their technical soundness, credibility of methodology, and relevance to the project objectives.

Further, the selected Firm is expected to undertake GIS analysis of the plantations and integrate its approach with e-green watch portal of the MoEF&CC. The findings shall be incorporated in the report
